Our Core Belief

**Our purpose is to make
playing instruments a whole
lot easier for you.**

About Us & Mission

If you like the sound of piano but you're convinced that playing it is a difficult trick, then you're at the right place! Our new learning system utilizes letter notes (see page "start here") and shortens the time at which you acquire knowledge by threefold!

Most importantly, as our users claim - learning with letter notes makes playing piano fun right from the beginning. If you want to start playing your favorite songs nice and quickly without having to worry about music theory, classic notes and other complicated things, all you need to do is pick a song from our site and start playing. It's really that simple!

To make your piano/keyboard learning process even easier, we provide a video tutorial for every song we post on our site. The tutorials show you how to easily play a given song step by step. You will also find out how to choose the right instrument and what other tricks will help you speed up your piano education even by 300%!

Vision

We continue to make videos and post content on our site all the time."

We don't limit ourselves only to keyboard lessons. We're taking up new projects that will help learning other instruments. We've already launched our harmonica-tabs.com projects and soon we'll be launching our flute lessons, too.

We're expanding to other markets. I. e. Poland, Spain, Germany."

WEBSITE STATS
